

# Nugaal Valley STEM School

## Budget & Financial Projection

This document outlines the estimated financial requirements for establishing Nugaal Valley STEM School, a semi-profit educational institution in Garowe, Somalia. The school will accommodate 250 students in grades 6–12, with a focus on science, technology, engineering, and mathematics (STEM). The budget includes costs for infrastructure, furniture, technology, operations, and land acquisition, with a projected total ranging from \$917,500 to \$942,500.

Category	Cost (USD)
Infrastructure & Construction	\$402,500
Furniture & Equipment	\$187,000
Technology & Connectivity	\$40,000
Operational Costs (2 Years)	\$238,000
Land Acquisition	\$50,000 - \$75,000
Grand Total	\$917,500 - \$942,500

### Additional Considerations:

1. Sustainability: Integration of solar energy to reduce long-term costs.
2. Partnerships: Potential collaborations with STEM-focused organizations for funding and equipment
3. Local Engagement: Community participation in construction and fundraising.
4. Scalability: Facilities designed for future expansion and increased enrollment.
